pitched trill as a simple markup

pitched trill as an articulation with stencil tweak (every second note)

pitched trill as an articulation with stencil tweak as music-function

Tweaking a trill stencil using a simple definition, stencil set to (make-pitchedtexttrill-markup XXX)

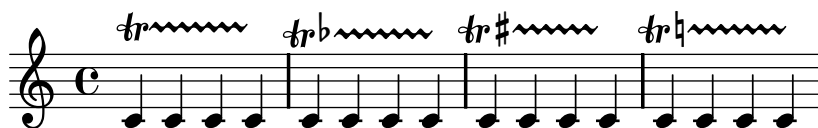

The same, using the text-interface::print stencil and the text property; Usine a music-function only works with - prepended

Tweaking trill spanners. Default text, but extra-offset

Changing text of trill spanner using \override before the note, text created by \markup{\pitchedtexttrill #XXX}

Trying to set the values using tweaks for the spanner. Apparently, tweaking the bound-details -> left -> text is not so easy!!!
